

ASSIGNMENT-14.1

Name: B.Chandu

HT. No: 2303A51737

Batch: 08

Lab 14: Web Design Application – AI-Assisted HTML/CSS/JS Generation

Lab Objectives

- Design functional, visually appealing web applications

Week7 -

Monday

using HTML, CSS, and JavaScript with AI assistance.

- Apply responsive, accessible, and interactive design principles.
- Create practical UI components for real-world web applications.

- Use AI to optimize layout, UX, and performance.

Task 1 – Portfolio Website Design

You are building a personal portfolio website to showcase your work.

Requirements:

- Create sections for About Me, Projects, and Contact.
- Use AI to:
 - o Suggest color palettes and typography.
 - o Create a responsive layout with Grid/Flexbox.
 - o Add smooth scrolling navigation.

The screenshot shows the Visual Studio Code editor interface. On the left, the Explorer sidebar displays a file tree for a project named 'AIAC'. The files include various Python scripts (e.g., 1.2_ass.py, 8.2_ass.py, 9.3_ass.py, 12.1_ass.py, 13.3_ass.py, A1.py, app.db, ass.py, ASS1.PY, Assignment.py, Lab exam.py, Mon.py, task1.html, task2.html, task3.html, task4.html, wed.py), a CSS file (a2.css), an HTML file (a2.html), and a JavaScript file (a2.js). The 'task1.html' file is selected and open in the main editor area. The code in the editor is an AI-generated HTML template for a personal portfolio website. It includes a comment at the top stating: 'Generate only HTML code for a personal portfolio website with sections: 1. Navigation bar, 2. About Me, 3. Projects, 4. Contact'. Below this, it lists requirements: 'Semantic HTML5 tags', 'Responsive layout using Flexbox or Grid', 'Smooth scrolling navigation', and 'Include placeholder content for projects and contact form-->'. The HTML structure starts with a DOCTYPE declaration, a meta charset of 'UTF-8', a meta viewport for responsive design, and a title 'Personal Portfolio'. The body contains a navigation bar with links to '#about', '#projects', and '#contact'. The code is as follows:

```
1 <!--Generate only HTML code for a personal portfolio website with sections:
2 1. Navigation bar
3 2. About Me
4 3. Projects
5 4. Contact
6 Requirements:
7 - Semantic HTML5 tags
8 - Responsive layout using Flexbox or Grid
9 - Smooth scrolling navigation
10 - Include placeholder content for projects and contact form-->
11 <!DOCTYPE html>
12 <html lang="en">
13 <head>
14 <meta charset="UTF-8">
15 <meta name="viewport" content="width=device-width, initial-scale=1.0">
16 <title>Personal Portfolio</title>
17 </head>
18 <body>
19 <!-- Navigation Bar -->
20 <nav>
21 <ul>
22 <li><a href="#about">About Me</a></li>
23 <li><a href="#projects">Projects</a></li>
24 <li><a href="#contact">Contact</a></li>
25 </ul>
26 </nav>
27
```

Task 2 – Online Store Product Page

Design a product display page for an online store.

Requirements:

- Display product image, title, price, and "Add to Cart" button.
- Use AI to:
 - o Style with BEM methodology.
 - o Make layout responsive.
 - o Add hover effects and "Add to Cart" alert.

Task 3 – Event Registration Form

Build an event registration form for a conference.

Requirements:

- Collect name, email, phone number, and session selection.
- Use AI to:
 - o Add form validation with JavaScript.
 - o Make the form accessible with labels and ARIA.
 - o Style with a professional look.

Task 4 – Resume Website

Build a one-page online resume.

Requirements:

- Sections: Profile Summary, Skills, Education, Experience.

- Use AI to:

- o Propose professional typography styles.

- o Align sections using CSS Grid.

- o Add smooth scroll navigation between sections.
